

AXOR

AXOR EDGE  
FORM FOLLOWS PERFECTION

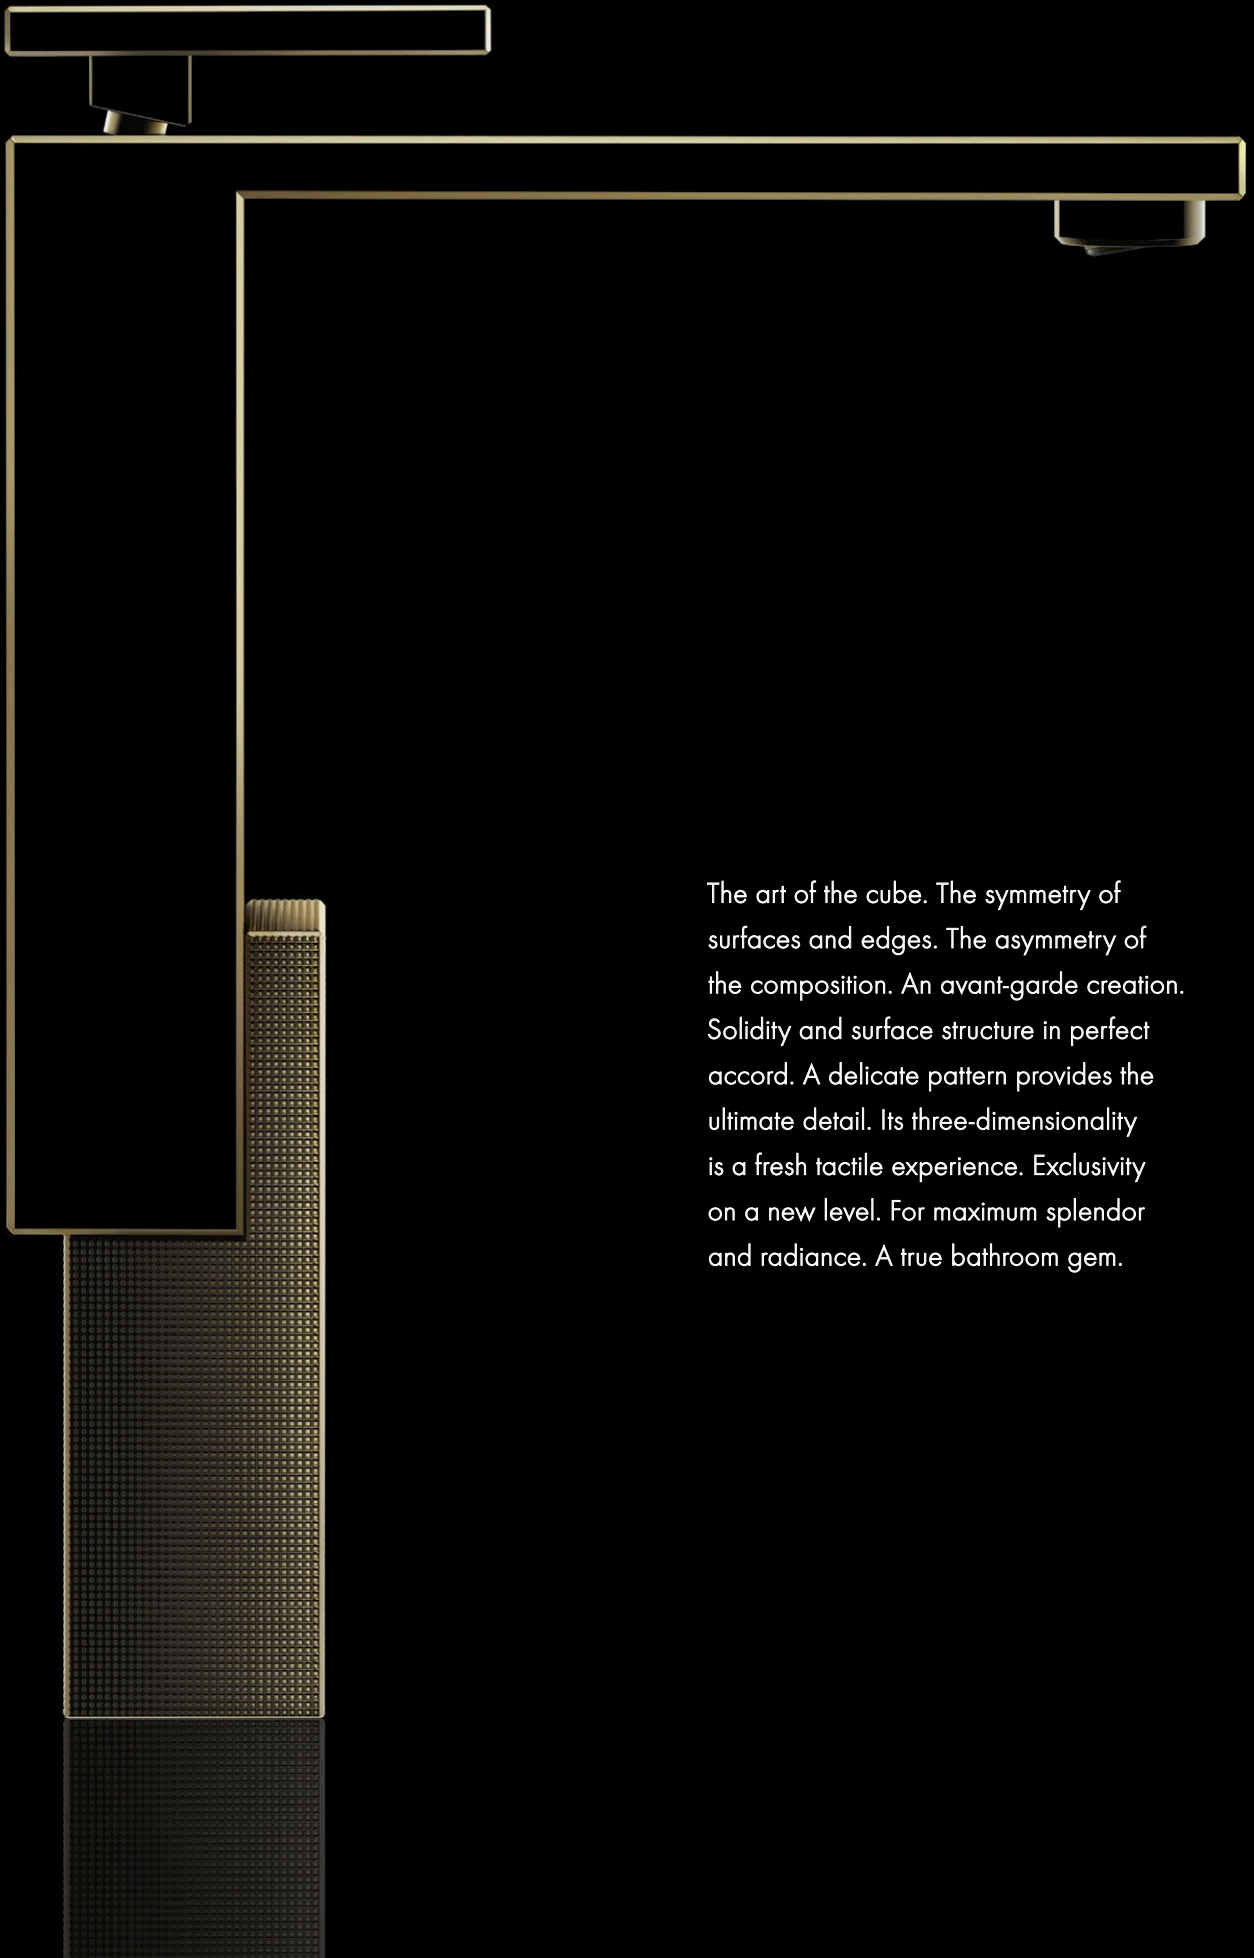

AXOR EDGE

ARCHITECTONICS.  
IN PERFECTION.

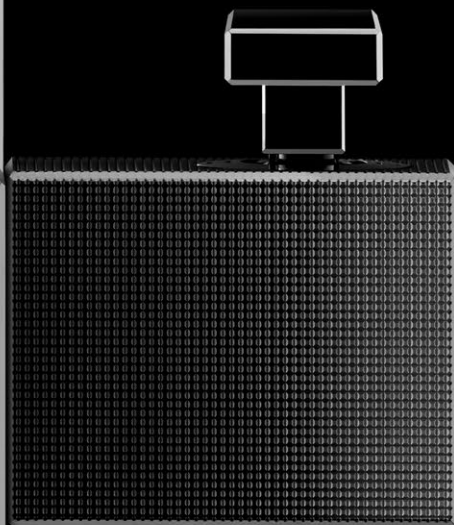

5

The cube. Ushered into art by the avant-garde of the early 20th century. Taken to a new level by AXOR Edge. An asymmetrical arrangement of rectangular prisms, crafted with ultra-precision. A masterpiece through and through. Cube by cube. Transcending aesthetic and technical boundaries. Cut with diamond, for edges and surfaces that verge on perfection. Enhanced with surface structures that create fascinating contrasts. On request, individualized with exclusive finishes such as Polished Black Chrome or Polished Gold Optic. A testimony to the discerning taste of its owner.

Design: Jean-Marie Massaud

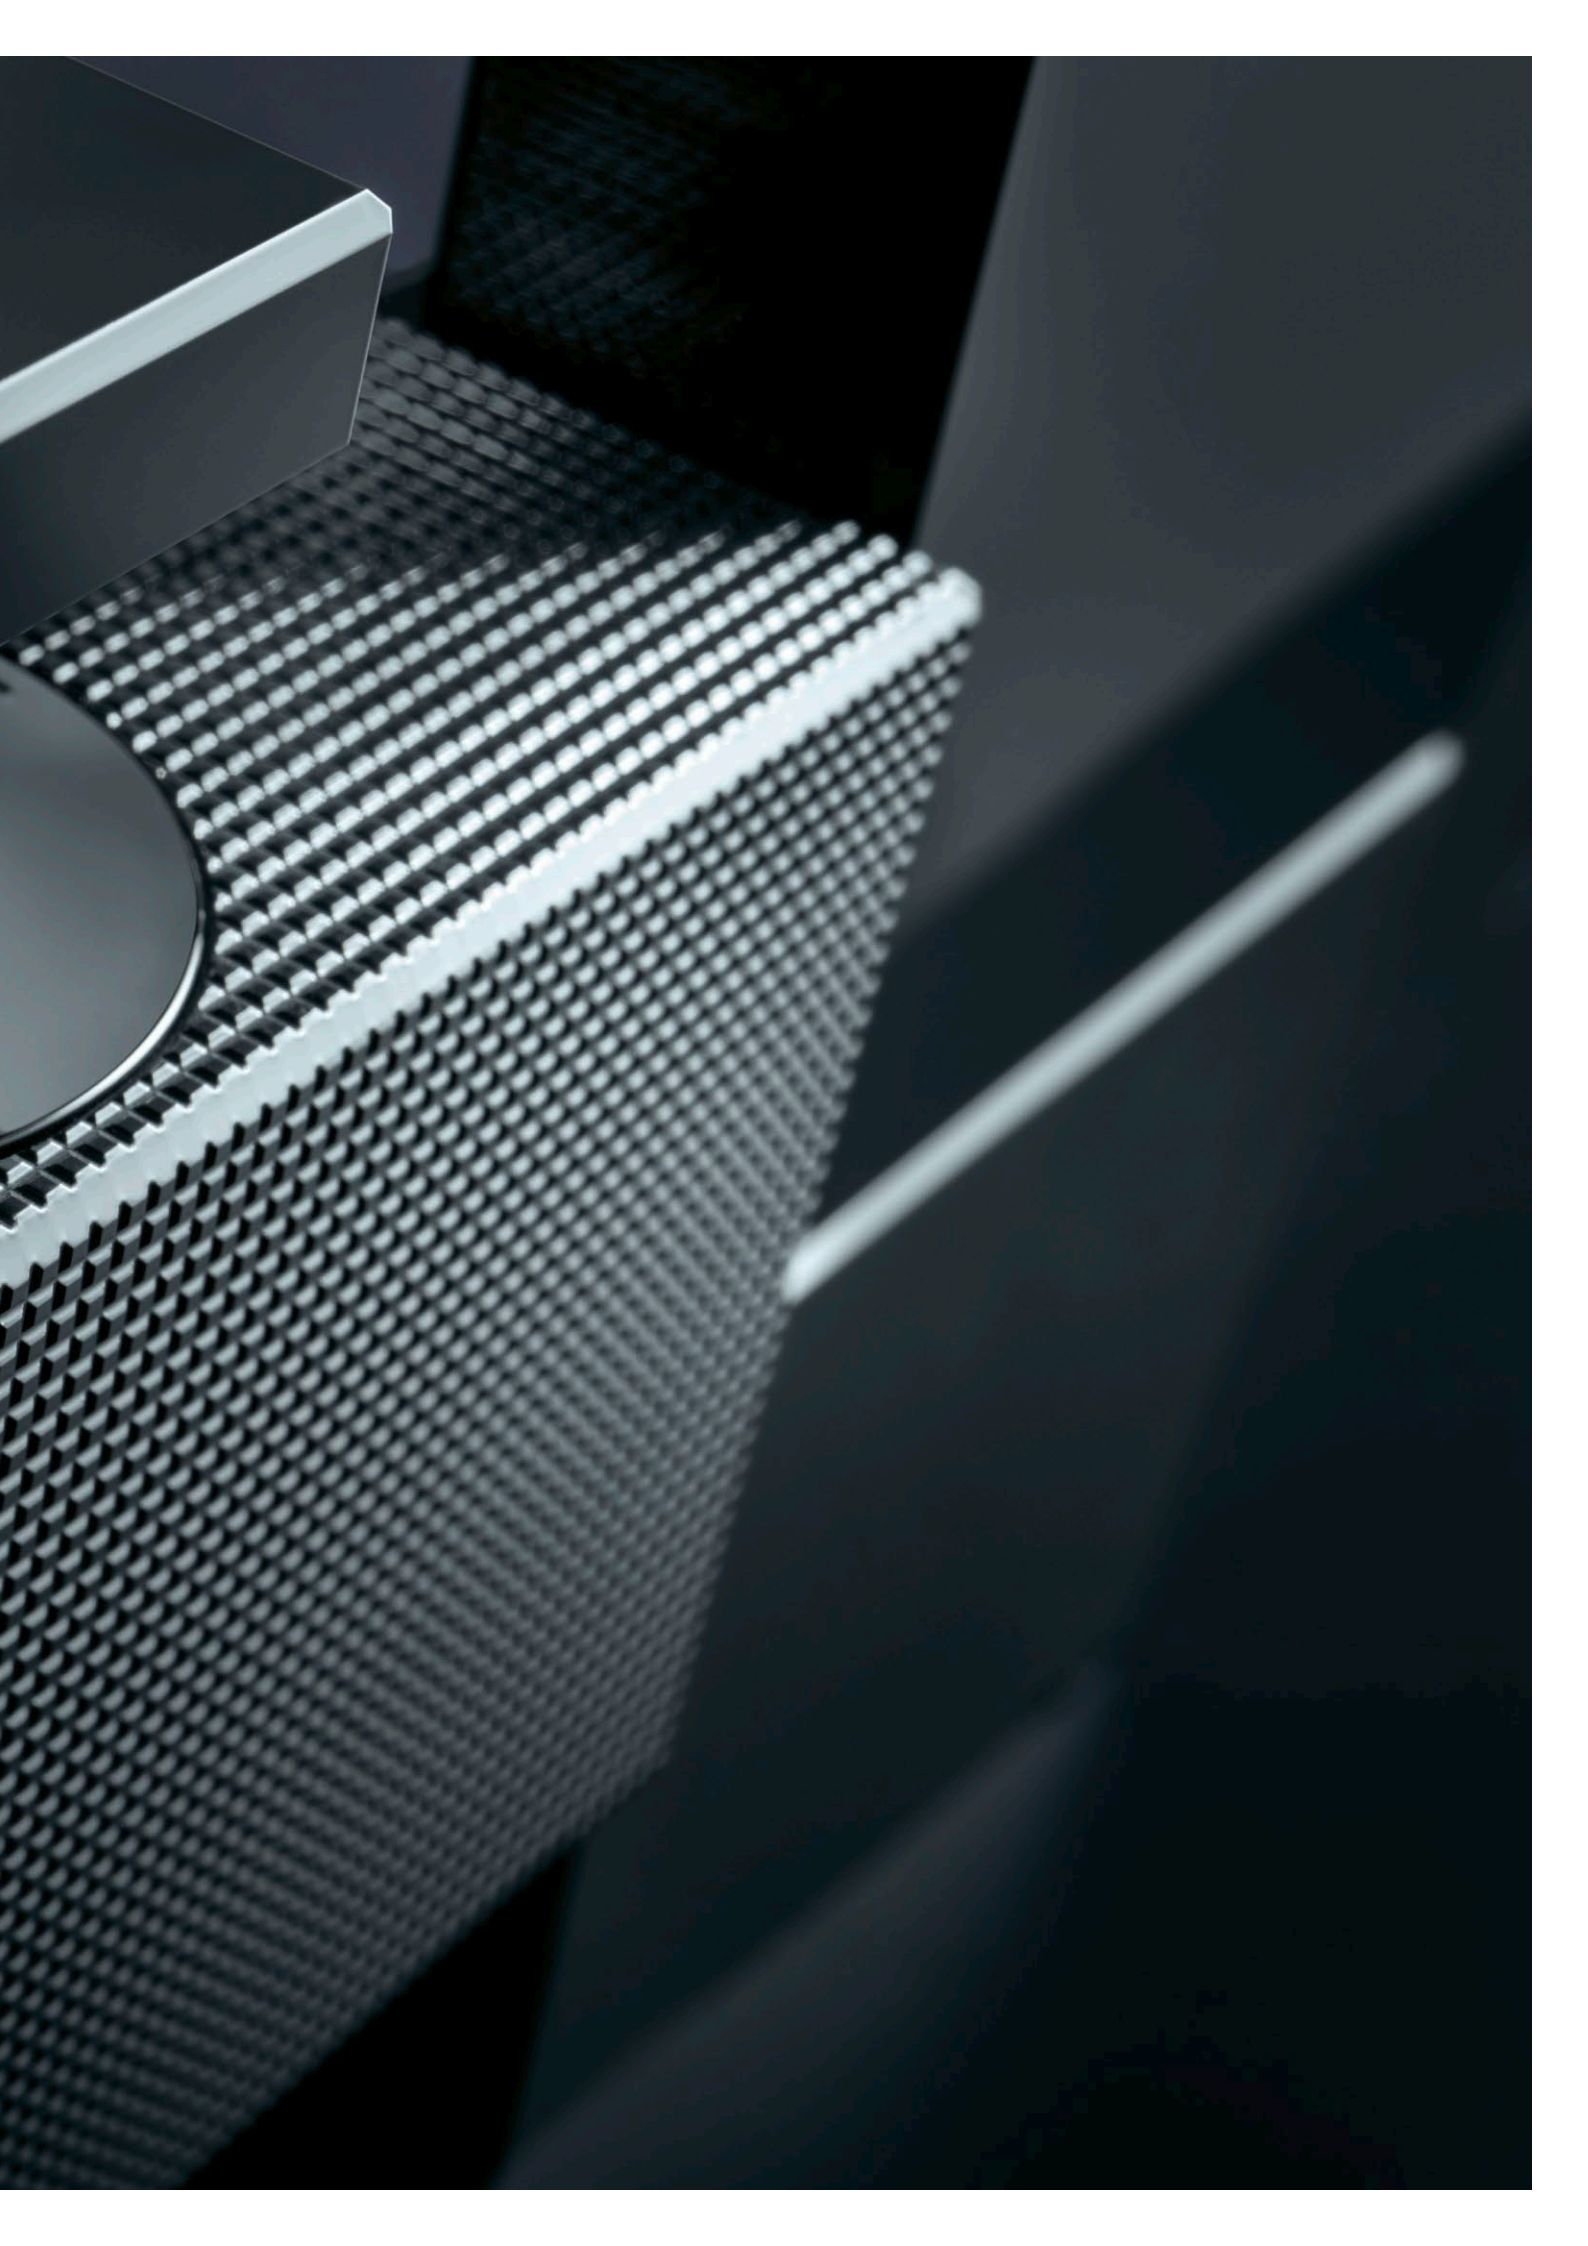

The art of the cube. The symmetry of surfaces and edges. The asymmetry of the composition. An avant-garde creation. Solidity and surface structure in perfect accord. A delicate pattern provides the ultimate detail. Its three-dimensionality is a fresh tactile experience. Exclusivity on a new level. For maximum splendor and radiance. A true bathroom gem.

Precision is the bedrock of brilliance. Diamond-cutting the benchmark for perfect planes and contours. A state-of-the-art diamond-cutting machine assures accuracy down to a thousandth of a millimeter. Specially developed for AXOR Edge. With the same diamond-tipped tool used in the space and laser industries. AXOR Edge puts AXOR at the forefront of technology.

The chamfers are milled at precisely 45 degrees. Edges and planes of the utmost precision. As demanded by the gloss test. All designed to reflect light to perfection.

The delicate structural details also derive from pure precision: Diamonds facet the surface of the solid brass block. Accurate to the micron. Creating precision-pointed pyramids. Reflecting the interplay of light and shadow. The consummation of a precious gem.

12

Polished Red Gold

Polished Bronze

Polished Gold Optic

Polished Black Chrome

Refinement finds its personal expression in the choice of exclusive AXOR FinishPlus surfaces. Lucent finishes enhance the natural brilliance of AXOR Edge. From Polished Red Gold to Polished Black Chrome.

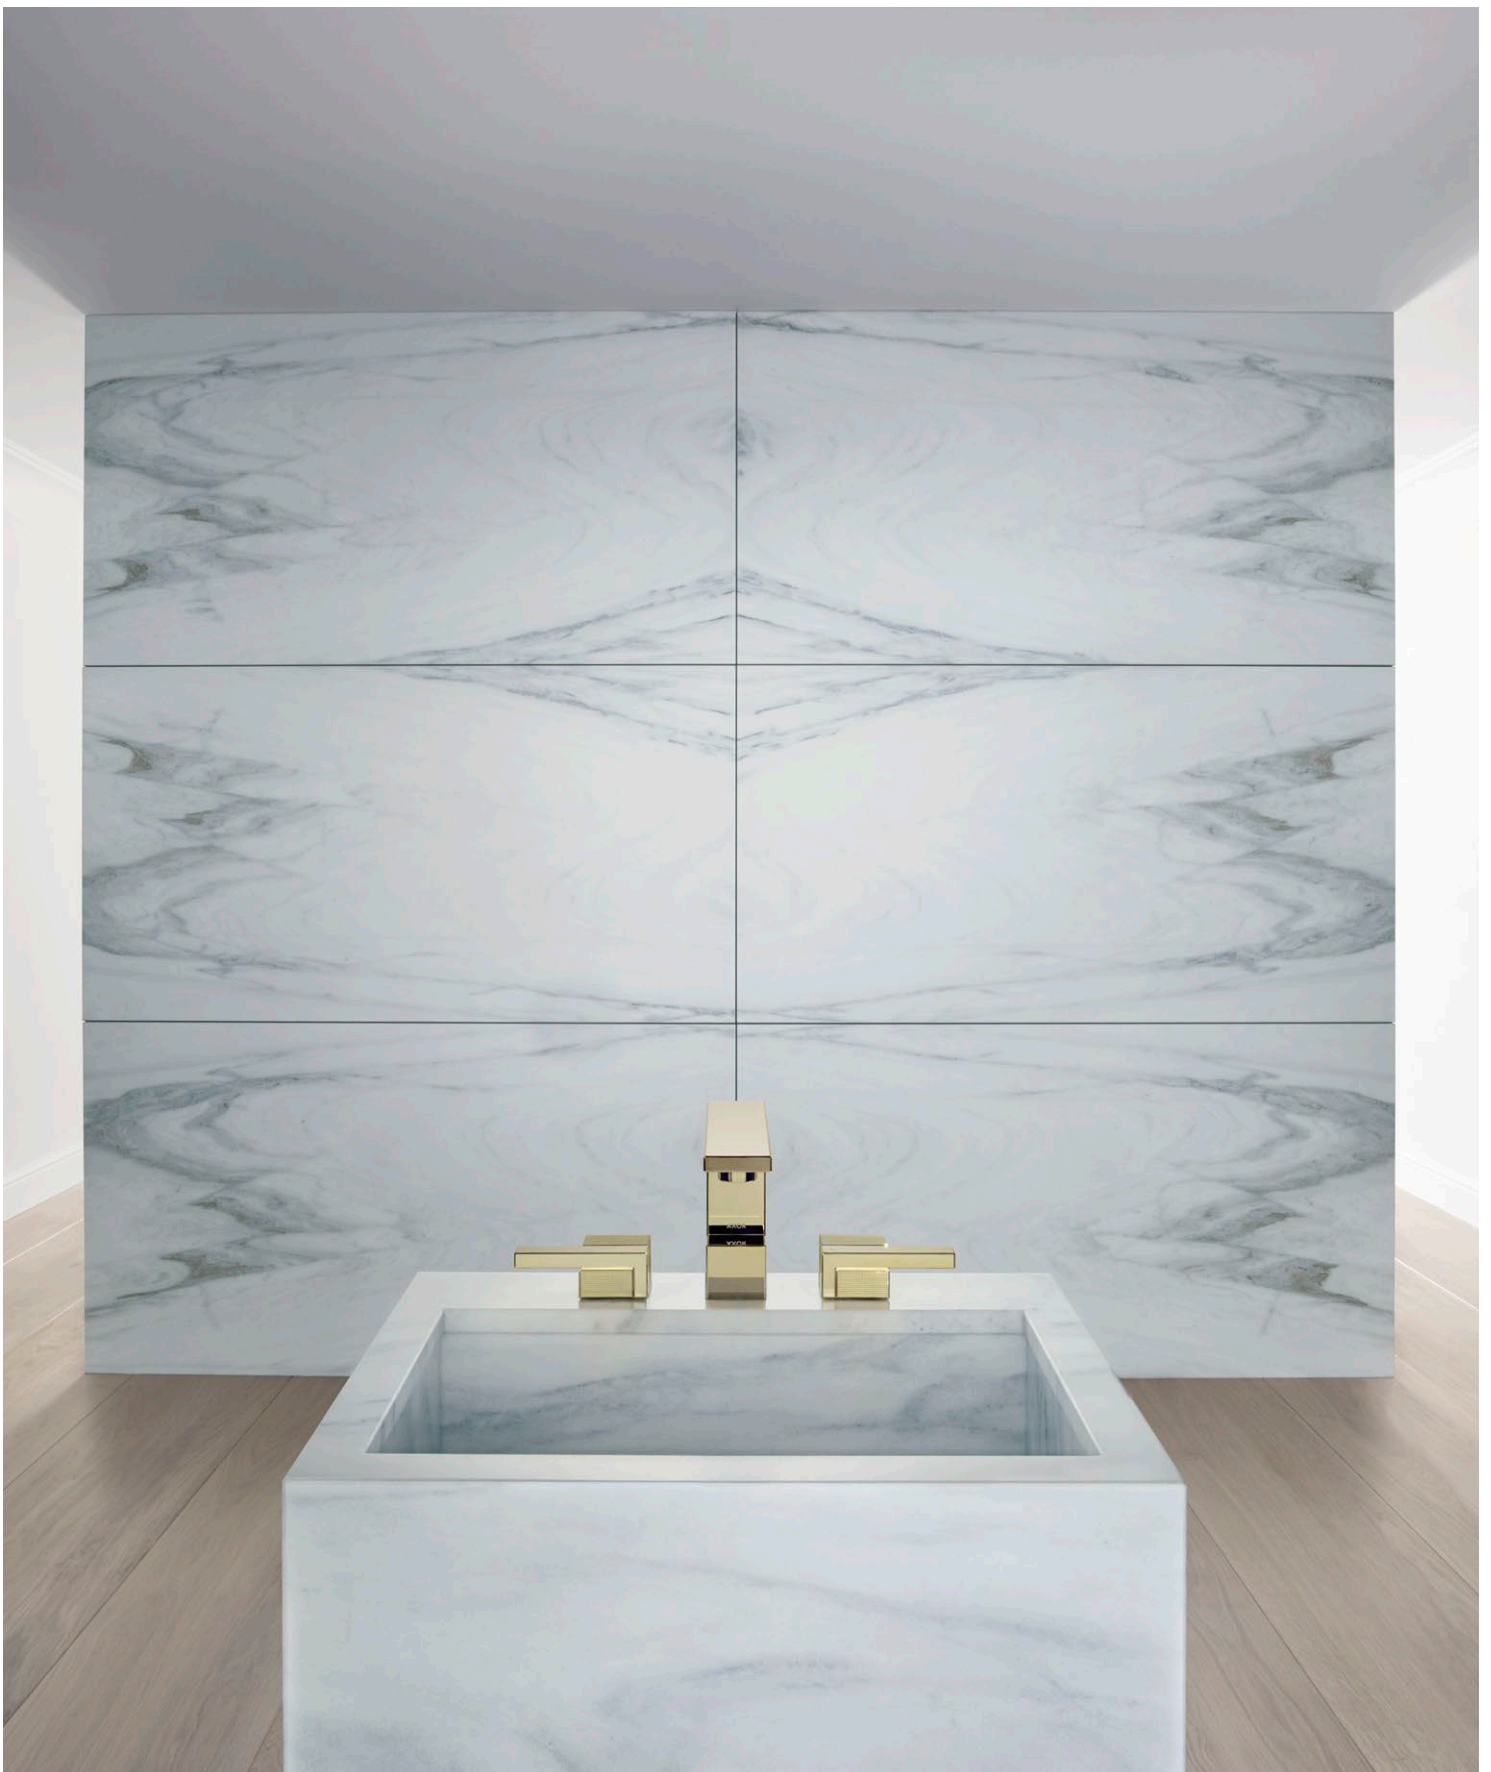

Manufactured to the highest technical standards. Finished using PVD (Physical Vapor Deposition) in AXOR's vacuum chambers. Cutting-edge technology that gives the finish more resistance, greater longevity and, above all, unprecedented brilliance and color. Ultra-radiance for an ultra-luxurious bathroom.

Unique and differentiating. AXOR Edge mixers transcend boundaries: The cube as a formative design element. High-gloss surfaces that maximize the distinctiveness of the collection. No matter which variant, an AXOR Edge mixer is that something extra for people with discerning taste.

Cubes on the wash basin in fascinating compositions. With an extravagant surface finish: Polished Gold Optic, a symbol of sumptuous luxury that brings a warm splash of color to the bathroom. As with this 3-hole basin mixer.

The tall version of the single-lever mixer offers even greater exclusivity and individuality. Thanks to its perfect shine and the fine diamond cut on the base.

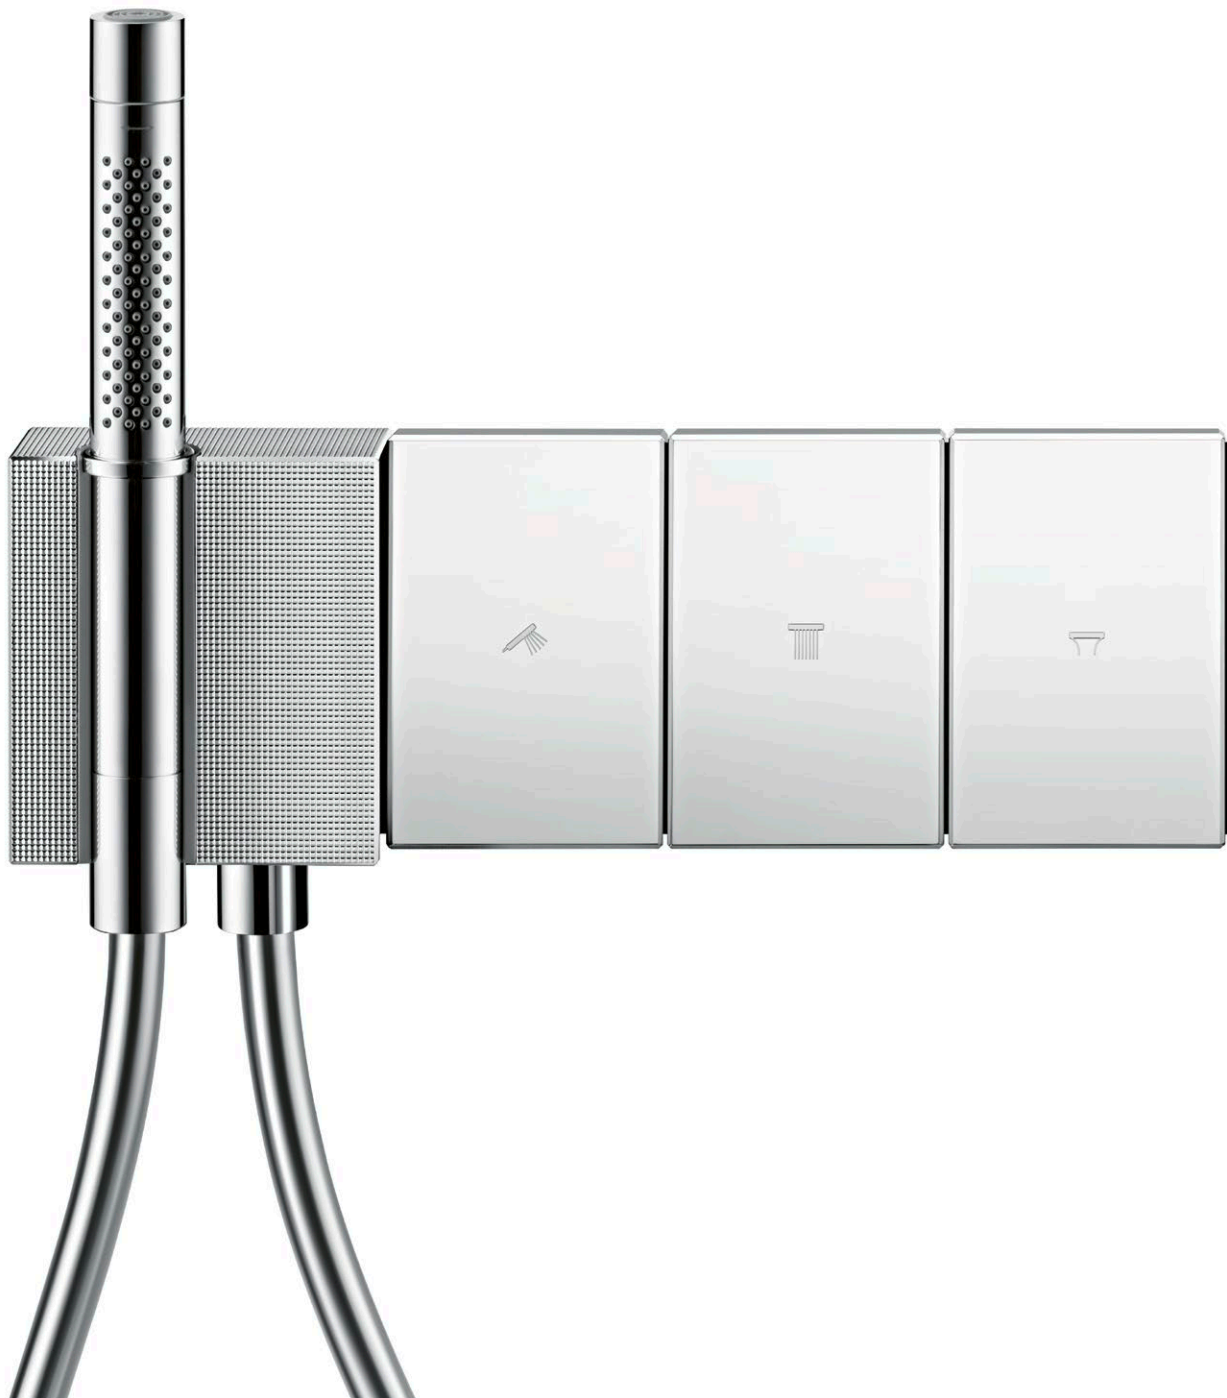

18

Sculptural expression: The floor-standing basin mixer. Striking. Towering. Absolutely scintillating. A highlight is the premium diamond cut. An awe-inspiring feature in the room.

Architectonics on the wall. Each individual element is outstanding in its own right. The AXOR Edge thermostatic module Select makes a genuine statement in the shower. Striking and elegant. Controlled by Select push-buttons, allowing up to five jet types or showers to be chosen intuitively. At the touch of a button. Mechanical precision for unrivaled control.

Extraordinary objects find their *raison d'être* in a luxurious shower. The AXOR Edge thermostatic module Select is the perfect control unit for the AXOR ShowerHeaven 1200/300 4jet. Two archetypes of monumental proportions. Avant-garde in the bathroom. Perfect in form and function. Something genuinely special, right down to the pattern of the water jet. Like PowderRain with its gently bubbling droplets.

Architectonics as a design principle. The generously proportioned shelf on the AXOR Edge thermostat for exposed installation is exceptionally striking. Particular attention should be paid to the impressive rotary controller, which combines temperature and water-volume control. Iconic design like that of a knob on a high-end sound system.

Up to three outlets can be easily controlled via the Select technology. For example, the AXOR overhead shower 300/300 2jet, which is an elegant addition to the shower and offers a PowderRain effect in two different intensities.

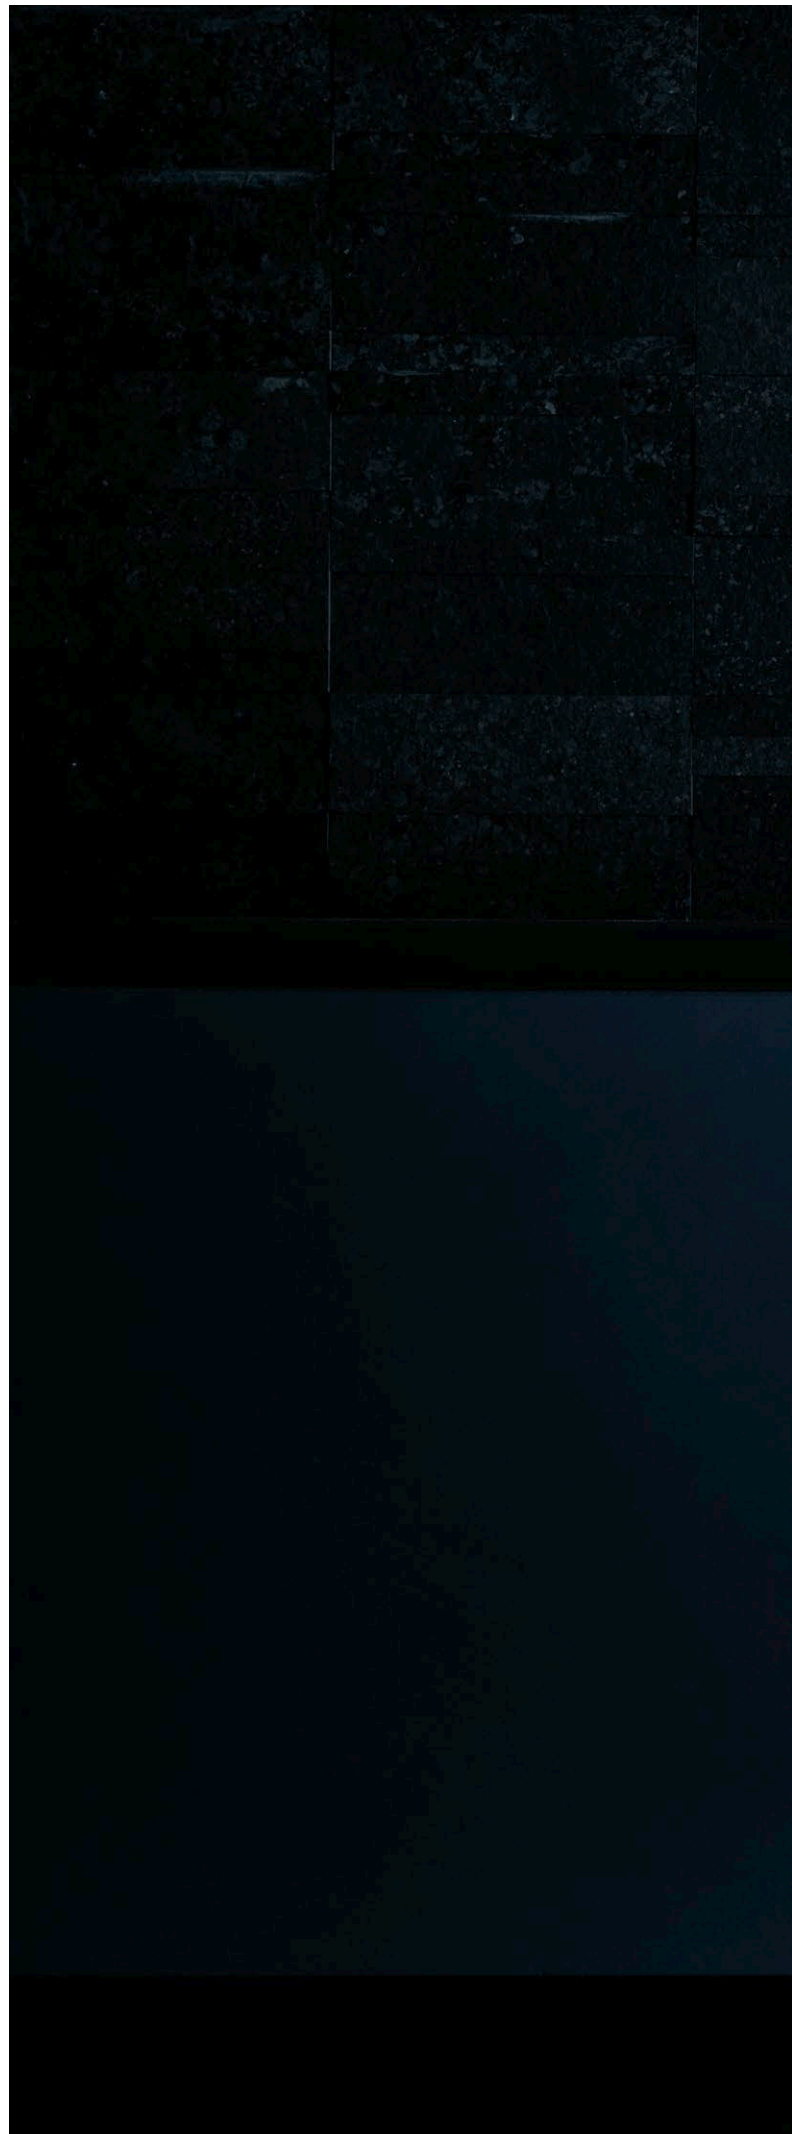

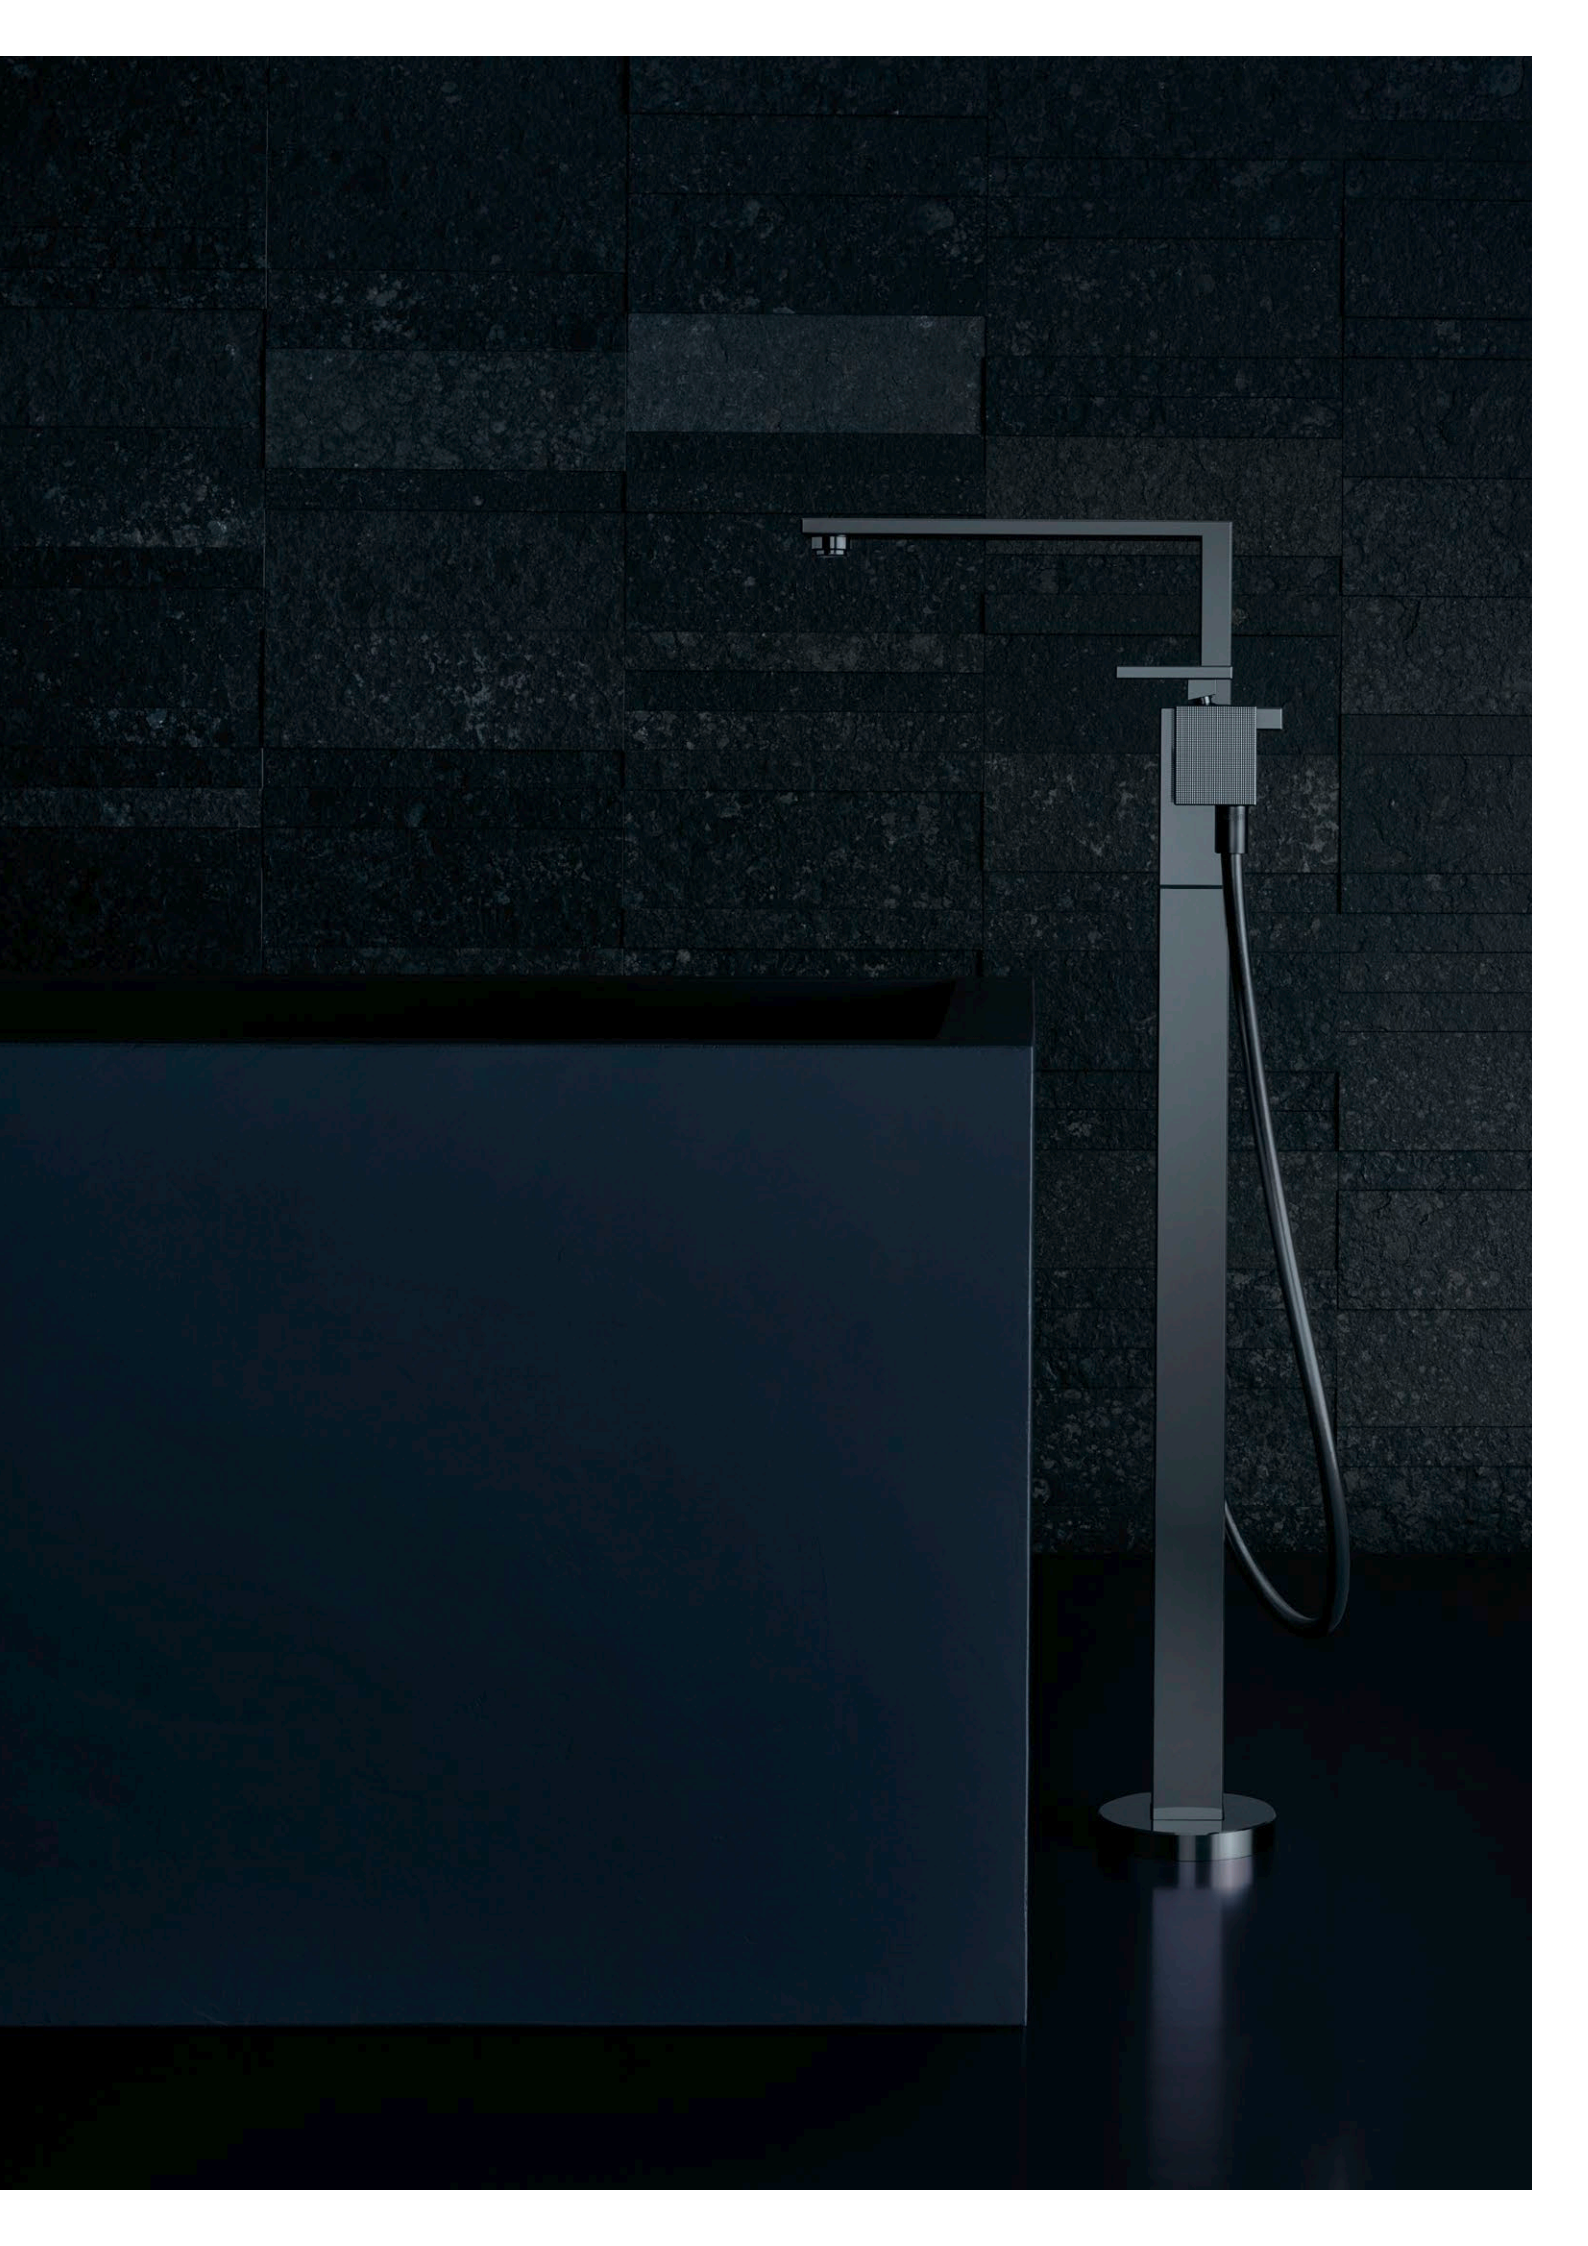

Symbol of confidence and individual style: Polished Black Chrome brings extravagance to the bathroom. Masterfully staged in the form of a floor-standing bath mixer of dramatic color shade and size. That certain something for extrovert personalities who celebrate expressiveness.

An exquisite masterpiece at the bathtub: The 3-hole rim-mounted bath mixer with hand shower exudes distinctiveness and exclusivity. Designed to satisfy discerning tastes and high aspirations. The diamond-cut surfaces and generously proportioned cubes deliver an exceptional design. Flawless functionality: The easy-to-use single-lever handle.

WASH BASIN
